The Grabit Factory

The Grabit Factory Grows with Your Child

The Grabit Factory is great for youngsters just learning to recognize numerals and for those beginning to learn addition and subtraction. Using a joy stick or the keyboard, your child operates a crane in The Grabit Factory to pick up number blocks that match a computer-selected number or that correctly complete a simple equation such as 2 + 5.

A Positive Way to Learn

If your child makes an error, there are no negative sounds or images to discourage your child from trying again.

An Easy Way to Learn

To play, your child only needs to operate a joy stick and use a single key. (The program is designed to allow the keyboard to be used rather than a joy stick, depending on your preferences.) Even the youngest child can take charge of the computer after only a few minutes of instruction.

An Unlimited Lifetime Warranty

The Grabit Factory carries an unlimited lifetime warranty. Even a diskette clogged with peanut butter and jelly will be cheerfully replaced.

This package contains one 5¼″ diskette and operating instructions.

ERIC COMMAND CARD

KEYBOARD OR JOY STICK:

APPLE: Program automatically defaults to joy stick during "booting". Keyboard can be activated and joy stick deactivated during load process by pressing the (SHIFT) and (K) keys at the same time while the ERIC logo screen is displayed on the monitor.

COMMODORE: Program automatically defaults to keyboard during "booting". To activate joy stick press the (J) key when "PRESS J FOR JOY STICK" appears on screen.

BOOTING COMMODORE PROGRAM: Type LOAD "*", 8, 1 (RETURN)

KEYBOARD COMMANDS

	Apple II+/II+	APPLE IIe/IIc (CAPS LOCK DOWN)	Commodore
To return to menu	(ESC)	(ESC)	(F1)
To Toggle Sound on/off	(SHIFT) (S)	(S)	(SHIFT) (S)
Left	LEFT ARROW	LEFT ARROW	(L)
Right	RIGHT ARROW	RIGHT ARROW	(R)
Up	(U)	UP ARROW	(U)
Down	(D)	DOWN ARROW	(D)

NOTE: In some cases devices such as the Koala Pad may send conflicting signals to the computer resulting in erroneous readings of the joy stick. Solution: unplug the device.
